

Energy & Utilities Cloud Sample Permission Sets

Sample Permission Sets and Permission Set Groups for Energy and Utilities cloud

Overview

With the Spring '22 release, you can also optionally deploy and install sample permission sets and permission set groups. The sample permission sets provide object, class, and page access. The sample permission set groups are customised to provide access rights for specific personas. You can use these samples with either Managed Package Licenses or permission set licenses.

Please refer to [Energy & Utilities Cloud Sample Permission Sets and Permission Set Groups Reference](#), [CLM and DocGen Sample Permission Sets Reference for CME](#) and [CPQ, EPC, DC, OM Sample Permission Sets and Groups](#) for documentation on Sample Permissions Sets and Permission Set Groups.

Package Installation and Inventory

Please refer to [Deploy Sample Permission Sets and Permission Set Groups](#) for installation instructions.
